Objective

- Motivated and eager first-year university student seeking opportunities to apply academic knowledge and gain practical experience in software engineering. Committed to continuous learning and professional development.

Education

- Bachelor of Computer Science, University of Wollongong, [26/02/2024] - Present

- High School Diploma, DSC International, 27/06/2023

Work Experience

Intern, BSD Education

- Worked under the supervision of CEO Nickey Khemchandani, gaining insights into organizational operations and professional conduct.
- Acquired knowledge about API integration and version control using GitHub.

Certifications

- Microsoft Word Certificate

Skills

- Intermediate proficiency in HTML, CSS, and JavaScript, with experience in creating adaptive and creative web designs.

- Strong teamwork abilities demonstrated through collaborative projects in various educational programs.

- Effective time management skills, as evidenced by balancing coursework, extracurricular activities, and internship responsibilities.

- Proactive approach to problem-solving, utilizing critical thinking skills to overcome challenges and achieve goals.

- Intermediate proficiency in Python programming language, acquired through self-directed learning and online courses.

- Attentive to detail, ensuring accuracy and precision in coding and project execution.

- Basic understanding of C++ programming language.

Extracurricular Activities:

Maker Camp
- Participated in hands-on activities using kits to create innovative projects.
- Developed a Dance Dance Revolution game using a Makey-Makey kit, showcasing creativity and technical skills.

ICT Boot Camp
- Utilized block coding techniques to design and develop various computer-based projects, including games.
- Gained practical experience in coding and programming robots using block coding.

First Code Academy
- Engaged in comprehensive learning experiences covering web designing, app development, and robotics.
- Developed proficiency in using block codes to create phone apps, websites, and program robots.

Codecademy
- Completed online coding courses on Codecademy, focusing on enhancing skills in Python programming language.
- Demonstrated commitment to continuous learning and self-improvement through online education platforms.
